Senior Flutter Developer — Interview Mastery Hub

Candidate: Irshath Ahamed

Role Target: Senior Flutter Developer (Portal/Mobile)

Interview Date: Friday, 10:00 AM (UAE Time)

Welcome to your offline master study hub. All documents are organized below by category so you can browse, study, and reference them directly inside your editor.

Study Schedule & Strategy

- [interview_study_schedule.md](#)
Your hour-by-hour study timetable from Wednesday through Friday 10:00 AM. Includes wake-up times, review blocks, break times, and tech setup countdown.
- [senior_flutter_interview_process_and_playbook.md](#)
The full 5-stage interview process, UAE/Dubai HR screening answers (Immediate availability, UAE Resident, 18k–22k AED range), live screen-share pairing etiquette, and high-impact reverse questions to ask the interviewers.

Project Depth, Identity & Technical Foundations

- [senior_flutter_interview_master_guide.md](#)
The core handbook: Your 90-second elevator pitch, Fusion platform deep-dive (architected from scratch), Golden Hippo white-label platform (maintaining/scaling an existing live codebase to 1,000+ brands), Clean Architecture, and Three Trees internals.
- [flutter_interview_qa_and_coding_master.md](#)
Complete Q&A covering Rounds 1 to 4: `const` vs `final`, Null safety, `StatefulWidget` lifecycle, BLoC concurrency, Dio JWT token refresh queue, and Live Coding Set 1 (Serialization, Debounce/Throttle, Pagination Cubit, Isolates, Shaders).
- [flutter_interview_master_vol2.md](#)
System Design & Advanced Engine: Battery-efficient GPS & geofencing, Multi-Tenant RBAC, Biometrics & Keystores, `BuildContext` as Element under the hood, Platform Channels vs Pigeon, SSL Pinning, Obfuscation, and Live Coding Set 2.
- [flutter_interview_master_vol3.md](#)
Hardcore Scenarios: Camera cross-platform (Web vs Mobile), client-side PDF timesheets with signatures, Anti-fraud (Mock GPS & NTP time tamper), Sunday 100% OT, RxDart, Dart FFI, Extension Types, and Live Coding Set 3.
- [senior_flutter_zero_blindspots.md](#)
The final 1% polish: Impeller vs Skia (Shader Compilation Jank), Flutter Web WasmGC, `runZonedGuarded`

error boundaries, `IntrinsicHeight` $O(N^2)$ layout hazard, Deep Linking, and App Store Section 3.1.1 payment compliance.

Live Coding & Technical Challenges (41 Complete Solutions)

- [senior_portal_mobile_live_coding_master.md](#)
7 Portal & Mobile Live Coding Challenges: Adaptive Master-Detail split-pane, Virtualized Web Data Table, Adaptive Modals, Keyboard Shortcuts Form (`Cmd+S`), Cross-Platform Image Uploader, Timesheet Shift Calculator with 24h Capping, and Offline-First Cache-Aside Repository.
 - [dart_algorithms_and_logic_master.md](#)
12 Classical Data Structures & Algorithms: Merge Overlapping Shift Intervals, Two Sum, Longest Substring, $O(1)$ LRU Cache, Valid Parentheses, Flatten Tree, Rotated Binary Search, Group Anagrams, 90° Matrix Rotation, Rate Limiter, LCA, and Deep Object Diffing.
 - [pure_logic_coding_interview_master.md](#)
10 Pure Logic & Brain-Teasers: Trapping Rain Water, Product of Array Except Self, Gas Station Circuit, Jump Game, Stock Max Profit, First Missing Positive ($O(1)$ Cycle Sort), Container With Most Water, Spiral Matrix, Roman Converter, and Connected Islands.
 - [senior_flutter_coding_audit_and_capstone.md](#)
Full curriculum audit confirming 100% coverage, plus 3 final capstone patterns: Custom Floating Overlay Dropdown (`CompositedTransformFollower`), Reorderable List item swap math, and Staggered Item Entrance Animations.
-

Behavioral & Leadership (STAR Method)

- [senior_flutter_behavioral_master.md](#)
12 STAR-format responses grounded in Fusion and Golden Hippo: Maintaining existing codebases, resolving backend API deadlocks, UI/UX designer conflicts, critical QA blockers, production crash triage, mentoring juniors, technical debt trade-offs, and executive communication.
