

3-Day Study Schedule & Hourly Timetable

Candidate: Irshath Ahamed | Senior Flutter Developer (Portal/Mobile)

Senior Flutter Developer — Hour-by-Hour Master Study Schedule

Target: Friday 10:00 AM Interview | **Timezone:** UAE (GST)

Timeline: Wednesday, Sept 16 – Friday, Sept 18

The 3-Day Blueprint Overview

3-DAY STUDY MASTER PLAN	
Wednesday (Day 1)	Projects, Behavioral STAR Stories & Portal Coding
Thursday (Day 2)	Flutter Engine, System Design & Logic Algorithms
Friday (Day 3)	Final Polish, Tech Setup & Game Day Execution

DAY 1: Wednesday, September 16 (Project Depth & Portal Form Factors)

🇸🇦 Morning Session (09:00 AM – 01:00 PM): Project Stories & Identity

- **Goal:** Lock down your 90-second introduction and project narratives until they feel natural.
- **Documents to Study:**
 - [senior_flutter_interview_master_guide.md](#) (Sections 1 & 2).
 - [flutter_interview_qa_and_coding_master.md](#) (Part I: Project Q&A).
- **Action Items:**
 - ☐ **09:00 – 10:30:** Read the **90-Second Intro** out loud 5 times. Emphasize: *Fusion built from scratch; Golden Hippo scaled an existing codebase across 1,000+ brands.*
 - ☐ **10:30 – 11:45:** Review **Fusion Field Platform:** Offline Outbox sync with UUID keys, `connectivity_plus`, timesheet calculators, and Web Portal memory/OOM diagnosis.
 - ☐ **11:45 – 01:00:** Review **Golden Hippo:** Flutter Flavors, single shared codebase, Node.js + AWS S3 build automation cutting turnaround by 30%.
- (01:00 PM – 02:00 PM: Lunch & Rest)

☀️ Afternoon Session (02:00 PM – 05:30 PM): Portal & Mobile Live Coding

- **Goal:** Master the core UI patterns required for the "Portal / Mobile" form factor.
- **Documents to Study:**
 - [senior_portal_mobile_live_coding_master.md](#)
- **Action Items:**

- ◻ **02:00 – 03:15:** Type out **Challenge 1 (Adaptive Master-Detail View)** in VS Code or DartPad. Understand `MediaQuery.sizeOf(context)` vs `LayoutBuilder`.
 - ◻ **03:15 – 04:30:** Type out **Challenge 2 (Virtualized Web Data Table)**. Understand why `ListView.builder` is used instead of a naive `DataTable`.
 - ◻ **04:30 – 05:30:** Review **Challenge 3 (Adaptive Modal)** and **Challenge 6 (Timesheet Shift Calculator with 24h Capping)**.
 - (05:30 PM – 06:30 PM: Break / Walk / Coffee)
-

🌙 Evening Session (06:30 PM – 09:30 PM): Behavioral & Leadership (STAR)

- **Goal:** Prepare for managerial and cross-functional questions.
 - **Documents to Study:**
 - [senior_flutter_behavioral_master.md](#)
 - **Action Items:**
 - ◻ **06:30 – 08:00:** Study **Questions 1 to 6** (Maintaining an existing codebase, backend API deadlocks, designer conflicts, QA blockers, and crash spikes).
 - ◻ **08:00 – 09:30:** Study **Questions 7 to 12** (Mentoring juniors, missing sprint estimates proactively, technical debt trade-offs, and executive communication).
-

DAY 2: Thursday, September 17 (Engine Internals, System Design & Logic)

🇪🇸 Morning Session (09:00 AM – 01:00 PM): Flutter Engine & Technical Q&A

- **Goal:** Master the deep technical questions (Three Trees, BuildContext, Concurrency).
 - **Documents to Study:**
 - [flutter_interview_qa_and_coding_master.md](#) (Part II: Rounds 1 to 4).
 - [flutter_interview_master_vol2.md](#) (Section 2: Engine & Dart Internals).
 - **Action Items:**
 - ◻ **09:00 – 10:30:** Three Trees (`Widget`, `Element`, `RenderObject`), `Widget.canUpdate()`, `BuildContext` under the hood (it is the Element), and `mounted` checks across async gaps.
 - ◻ **10:30 – 11:45:** Concurrency & Event Loop: Microtasks vs Event queue, `Isolate.run()` for heavy JSON/image processing.
 - ◻ **11:45 – 01:00:** BLoC concurrency transformers (`droppable`, `restartable`, `sequential`), Dio `QueuedInterceptor` for token refresh, and Clean Architecture layer contracts.
 - (01:00 PM – 02:00 PM: Lunch & Rest)
-

☀️ Afternoon Session (02:00 PM – 05:30 PM): Logic & Algorithmic Challenges

- **Goal:** Build muscle memory for analytical, DSA, and pure logic problems.
- **Documents to Study:**
 - [dart_algorithms_and_logic_master.md](#)
 - [pure_logic_coding_interview_master.md](#)
- **Action Items:**

- ☐ **02:00 – 03:00:** Merge Overlapping Shift Intervals (Problem 1) & Two Sum (Problem 2).
- ☐ **03:00 – 04:15:** Trapping Rain Water (Two Pointers) & Product of Array Except Self.
- ☐ **04:15 – 05:30:** First Missing Positive (\$O(1)\$ space Cycle Sort) & Gas Station Circuit.
- (05:30 PM – 06:30 PM: Break / Exercise / Disconnect)

🌙 Evening Session (06:30 PM – 09:30 PM): System Design & HR Screening

- **Goal:** Solidify system design architectures and salary/visa communication.
- **Documents to Study:**
 - [flutter_interview_master_vol2.md](#) (Section 1: System Design).
 - [senior_flutter_interview_process_and_playbook.md](#)
- **Action Items:**
 - ☐ **06:30 – 07:45:** System Design: Battery-efficient GPS tracking (Haversine filters, Android Foreground Services vs iOS background tasks) and Multi-Tenant RBAC.
 - ☐ **07:45 – 08:45:** Review HR negotiation: Immediate availability, UAE Resident status, 18,000–22,000 AED range, and the 2 reverse questions.
 - ☐ **08:45 – 09:30:** Skim [senior_flutter_zero_blindspots.md](#) (Impeller vs Skia, WasmGC, `runZonedGuarded`).
- **10:00 PM: SLEEP EARLY!** Do not study late into the night. Your brain needs rest for sharp recall tomorrow.

DAY 3: Friday, September 18 (Game Day Execution)

FRIDAY MORNING COUNTDOWN TO 10:00 AM	
07:30 AM	Wake up, light breakfast, hydrate
08:30 AM	Skim Zero Blindspots & 90-second pitch (30 mins only)
09:00 AM	Hardware, Camera, Mic & Screen-share setup
09:30 AM	Deep breathing, quiet room, glass of water
10:00 AM	INTERVIEW BEGINS – KNOCK IT OUT OF THE PARK!

Detailed Morning Timeline:

- **07:30 AM:** Wake up. Have a light, protein-rich breakfast. Drink a glass of water.
- **08:30 AM – 09:00 AM (Light Warm-Up Only — No Heavy Reading):**
 - Re-read your **90-second intro** once.
 - Review your **2 questions for them**:
 1. "Given that this internal application is preparing for its production launch, what are the biggest technical risks or stability hurdles the team is focused on resolving right now?"
 2. "How is user traffic split between the mobile app and the portal/tablet interface, and are there plans to introduce more desktop-specific workflows?"
- **09:00 AM – 09:30 AM (Technical Setup):**
 - Check your laptop battery (plugged into charger).

- Test webcam, microphone, and internet connection.
- Open VS Code with a clean, empty project ready if live coding is asked. Set editor font size to 16–18px (`Cmd + +`).
- Close all unnecessary browser tabs, Slack, WhatsApp, and email notifications.
- **09:30 AM – 09:55 AM (Mental Centering):**
 - Put phone on silent.
 - Sit comfortably. Keep a glass of water next to you.
 - Remind yourself: *You have built enterprise platforms from scratch, scaled systems to 1,000+ clients, and you know this material inside out.*
- **10:00 AM:** Join the meeting with a warm smile, positive energy, and ace it!
